Interests

Proactive and solution-oriented AI professional with a background in mathematics. Passionate about designing and developing scalable ML systems to drive business value and innovation particularly with LLM-based applications. Intrigued by the possibilities of NLP, Generative-AI, Computer Vision and applications of mathematics to data science and deep learning.

Experience

March 2024 - Present

AI Engineer at Chinar Quantum AI, Srinagar, J&K, India. (Hybrid)

November 2023 - January 2024

AI Engineer at AIQuantum.ai, Srinagar, J&K, India. (Hybrid)
My role primarily focused on implementing conversational features using Natural Language Processing (NLP) to enhance user interactions and streamline the booking process for end users in an AI-powered MVP solution for doctor-appointment bookings.

Education

2018 - 2021

BSc (Hons) Mathematics, GPA 8.16/10, University of Delhi, New Delhi, India.
Courses: Real Analysis, Introduction to C++ programming, Introduction to Databases, Linear Algebra, Abstract Algebra etc.

Volunteer Experience

May 2023 - Present

Instructor, Chinar Quantum AI
Responsibilities: Delivered sessions and managed the cohort for Python for Data Science

January 2019 - January 2020

Member, Technical Team, Enactus Shivaji

Summer Schools & Courses

January 2023

Machine Learning in Python with Scikit-Learn, France
Université Numérique & Inria

July 2022

Deep Learning Summer School, Neuromatch
Project: An Empirical Study of Catastrophic Forgetting in Transfer Learning

Skills

Programming	• Python (Langchain, Scikit-Learn, NumPy, Pandas, Matplotlib, Plotly, Dash) • C++ • HTML & CSS
Version Control	• Git, GitHub
Database Management	• MongoDB, PyMongo
IDEs	• VS Code
